

SHEAR GUARD®

PROUDLY MADE IN THE USA

US and International Patents Pending

Shear Guard® coupling support protects flexible couplings joined to clay pipe from shear failure and pipe offsets.

Installation Guide

Step 1
Slide the *Shear Guard®* support onto 4" exposed plastic pipe that is to be joined to existing clay pipe.

Step 2
Attach flexible coupling to pipes then tighten both bands.

Step 3
Slide the *Shear Guard®* support into place over flexible coupling aligning clamp screw into key hole.

Step 4
A Properly installed *Shear Guard®* support; bedding and backfill per local codes.
